

1. Question

- You are given a number n , representing the count of elements.
- You are given n numbers.
- You are required to find the span of you (span is defined as difference of maximum value and minimum value).

Span of Array

- if $n \rightarrow n$ of a_1, \dots, a_n
 - max, min
 - Span = max - min
- check / print
- min = arr(0)
span (1-)
